BERGMANN

Compact dumpers

Fast and manoeuvrable.

With a short tail, high sitting position, economical engine and swivel tip, a compact dumper C805s, C807s and C810s is your transport vehicle for fast and safe work at small and medium-sized construction sites. Equipped with a weather protection roof with a windscreen (optional), the C810s can be used all year round. Well-conceived: the roof is simply lowered for transport on a truck.

➤ Best overview

A short tail and a high sitting position ensure the operator the best all-round overview. For quick and safe work.

➤ Year-round use

Thanks to a collapsible weather protection roof (optional). In focus: health protection, profitability, transport costs.

➤ Safety for the operator

The operator enters the dumper outside the danger area. Because safety is the priority, right from the start.

Wheel dumpers

Masterful at any construction site.

C 815 s

The wheel dumper C815s shows that efficient work, cross-country mobility, travelling comfort and safety are ideally compatible. Any C815s confidently masters everyday challenges. The Bergmann provides the operator with optimal conditions for concentrated work. The rotating operator stand (optional) ensures the best overview, both forwards and backwards. The interior of the air-conditioned driver's cab inspires with high quality equipment.

➤ Best all-terrain traction

With large tyres, articulated swivel joint and spring-suspension front axle, the C815s also safely handles rough terrain under its wheels.

➤ A real performer

In addition to high performance technology, the cab, with its rotating driver's stand (optional), enables fast, safe work.

➤ For any requirements

Rear, tree-way, swivel tip or carrier vehicle with quick-change apparatus, your Bergmann has the equipment you need for your construction site.

Track dumpers

C 912s

Strong on any substrate.

The track dumper C912s does its job even on rough terrain. The powerhouses on tracks convince with high transport performance, are low-emission and economical in consumption and offer maximum safety. Two hydrostatic power trains with constant full power, optimal weight distribution with any load and the hydraulic parking brake for a guaranteed secure hold even on extreme inclines make practically any terrain accessible.

► High speed

With a well-conceived safety concept and a driving speed of up to 15 km/h, the C912s is convincing even on the most difficult substrate. Safe and high-performance.

► Economical and low-emission

State-of-the-art engine technology convinces with lowdiesel consumption and low emission values. Economical and environmentally friendly.

► Convincing ergonomics

The spacious driver's cab with rotating operator stand (optional) makes turning manoeuvres superfluous. Efficient and back-friendly.

Ready for the future.

New names. New opportunities. Worldwide.

All Bergmann vehicles have had new names since 2020. With this strategic step, we are adapting our system to the international market and are thus setting the course for further expansion. For you, everything remains the same: Bergmann will continue to stand for first-class quality "Made in Germany".
